

The Salem-Keizer School District and its engineering advisory board are planning a luncheon for students who are contemplating a career in engineering or technology. This event will occur on Wednesday, February 17, 2010 in conjunction with the National Engineers Week. The goal is to expose high school students to various engineering disciplines through exhibits, speakers, discussion with professionals at lunch, and tours of projects or facilities. The tentative agenda includes:

- 11:00 a.m. Vendor fair, including college and university representatives
- 11:30 a.m. Lunch with an engineer
- 12:00 p.m. Keynote speaker
- 1:00 p.m. Industry tours
- 3:00 p.m. Event ends, buses return to schools

In order to fund this event, we are seeking sponsorships from various engineering professionals and firms who have ties to both engineering and the Salem area. In addition to the good feeling of knowing you are providing a service to our profession by this professional outreach to future colleagues, sponsors will be recognized at the luncheon. If you and/or your company would be interested in sponsoring a group of students, hosting a tour, or describing your engineering career to these highly motivated young adults, please complete the attached sponsorship form and return by December 25th to:

ATTN: Lance Clark
ASCE Oregon Capital Branch
5150 Liberty Rd.
Dallas, OR 97338

Thank you in advance for your support of this local event. Interactive activities such as this will help ensure there are highly qualified engineering professionals for the future. Plans for this event are being developed, you will be notified of the location and tours once the final plans are completed. Thanks for your support!
